

IONPURE® LX-X HIGH PURITY CONTINUOUS ELECTRODEIONIZATION (CEDI) MODULES

IONPURE LX-X — INDUSTRIAL CEDI MODULE

The Ionpure® LX-X industrial modules produce high purity water through electrodeionization for a wide range of industrial applications. LX-X modules consistently deliver maximum reliability and superior performance for power, HPI/CPI, general electronics, food and beverage and laboratory applications without regeneration downtime.

LX-X Series Features

- Generates mixed-bed quality deionized water without the use of chemicals
- Significantly lower operating costs, than conventional ion exchange
- No need for acid/caustic, neutralization system or exchangeable DI tanks
- Double O-ring seal guarantees leak-free operation
- Continuous production instead of batch, with consistent quality
- Superior electrical isolation
- Proprietary "all-filled" concentrating compartments eliminate recirculation pump and brine injection
- Continuous operation
- Wetted materials meet applicable specifications for food or drinking water contact, and are suitable for the production of pharmaceutical grades of water

OPERATING ENVIRONMENT

Installation should be indoors with no direct sunlight and should have a maximum ambient temperature of 113°F (45°C).

QUALITY ASSURANCE STANDARDS

CE marked. Each module is factory tested to meet strict industry standards and is manufactured in an ISO 9001 and ISO 14000 quality and environmental management system.

Halal Certification. All Ionpure modules are manufactured in accordance with the Islamic Food and Nutrition Council of America standards (IFANCA), and will carry the Crescent M Halal logo.
